

"LEAN 101 SEMINAR" (Theory & Practical)

"Lean 101 Seminar" (Theory & Practical)

Topics will include:

- Benefits of lean Principles
- Value added and non-value added activities
- Identifying and eliminating 8 Wastes
- Visual controls & KPIs
- Kanban system - Push vs. Pull system
- Material and information route system
- 5S (shop floor/office) and its benefits
- TQC . building quality into processes
- Developing and applying standard works
- Cellular manufacturing & One piece flow
- Line balancing - line balance ratios, Line arrangement efficiency, optimum manning
- Real life examples of lean applications from Japan . (shop floor and administrative lean)

BONUS: During the seminar we will go through the theoretical aspect of lean applications followed by a practical simulation to demonstrate the benefits of lean.

Event Schedule

Registration will begin at 7:00 AM

The seminar will start at 7:30AM and end at 4:00PM.

A continental breakfast and lunch will be provided.

Parking is available

ROBERT ADELUGBA

Robert holds a B.S. degree in Mechanical Engineering and a M.S. degree in Advanced Industrial Manufacturing Systems from Kingston University in London England. He has worked with companies in the United Kingdom, here in the United States and has also benchmarked various companies in Japan including Toto and Toyota.

Robert is experienced in both strategic & hands on lean implementation within the administrative and production areas of various industries including retail, aerospace, automobile and manufacturing companies.

He has helped transform various companies from the traditional batching manufacturing system to world-class lean business systems. As a result these companies have maximized their productivity, sales and profit, through drastic elimination of waste, process standardization and total quality control. He has improved processes for companies with a high volume/low mix and a low volume/high mix production systems.

APICS

Is a nationally recognized leader in the development and promotion of educational training materials in the areas of production and inventory management and operations. APICS is committed to the development of operations management excellence in individuals and organization with the goal of improving the value of their business performance
